

Playdough Challenge

Give students five minutes to make as many items that fit the category shown. You can show the category on a projector or just call them out. You could have distance learning students collaborate with a partner. The in-person student can be the "hands" while the distance learning student comes up with ideas. Students can verbally share what they created, and/or you can take photos from a distance to share with the entire class. Photos will probably need to be cropped and zoomed in if taking photos from six feet away.

Create as many foods as you can.

Create as many animals as you
can.

Create as many things that relate to birthdays as you can.

Create as many things that relate to transportation as you can.

Create as many things that relate to school as you can.

Create as many things as you can
that relate to winter.

Create as many things as you can
that relate to holidays.
